

-Timmins Family Health Team Palliative Primary Care Program supports individuals living with a life threatening illness and their families navigate the health care system.

Our team consists of a group of dedicated health care professionals in partnership with community resources/agencies to provide support for physical, emotional, social and psychological needs.

In partnership with other community resources, we will work with patients and their families to provide Palliative Care support that is appropriate, timely and pertinent to their personal goals of care.

Palliative Primary Care Program

What is Patient Navigator?

- Facilitate referrals to appropriate services including a primary care provider and palliative care consultation
- Gather information on patients such as Advance Care Planning, pertinent Health Care Information and other service provider involvement in the patient's care.
- Conduct follow up calls to patients/families to ensure care needs have been met
- Support patients while they learn to self-navigate
- Liaise with CCAC, community agencies and Primary Care Providers in the development of a coordinated care plan.
- Be involved in discharge planning with hospitals, Regional Cancer Centre and Long Term Care Facilities to ensure a smooth transition from acute to community care.

Grief Support Group

Refer clients to TFHT website for upcoming groups and registration

This program will provide access to a Primary Care Provider, Palliative Care Physician consultation, nutrition and counseling services. The Patient Navigator will facilitate access to community resources/agencies while supporting patients and families as they learn to self-navigate the health care system.

We accept referrals from a variety of sources including patients, families/friends, nurses, Nurse Practitioners, community agencies, Long Term Care Facilities, Oncology, CCAC, hospital / ER and MD.
